DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-28 and 44-48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 28 both recite "said binding elements being peptides peptoids (N-substituted oligoglycines) or other peptoid-like oligomers". It is not clear whether or not Applicant refers to peptides and peptoides in the alternative because there is no comma between peptides and peptoides. Also it is not clear as to what Applicant means by "peptoid-like oligomers". The specification describes peptoids as meaning peptide-like molecules (see paragraph 0099). Given their broadest reasonable interpretation, peptoids (i.e., peptide-like molecules) mean polymers with amino acids. However, the term "peptoid-like" is never used in the original specification and it is unclear as to what Applicant means by "peptoid-like oligomers".

The remaining rejected claims are vague because they depend from claim 1 or 28, which are vague for the reasons set forth above.
